EDUCATION

New Jersey Institute of Technology, Newark, NJ December 2024

Bachelor of Science in Computer Science

EXPERIENCE

Freddie Mac, McLean, VA (Remote) March 2025 - Present

Software Engineer (Developer Experience)

- Engineer and support the CI/CD and release platform for 300+ financial applications. This includes Jenkins pipelines, Bash automation, enterprise base images, DevBox environments, and reusable pipeline components that standardize build, test, and deployment.
- Automate release-train promotion to production for business-critical systems, including Federal Reserve payment platforms and financial-market applications.
- Build and maintain the org-wide developer toolchain - enterprise base container image, DevBox sandbox, and language runtimes (Golang, Java/Tomcat) - enabling hundreds of engineers to build and test reproducibly.
- Own JFrog Artifactory and enterprise container infrastructure. Troubleshoot failures across Jenkins, Linux, containers, networking, and application repos to unblock builds and production releases.
- Cut infrastructure costs by $300K+ annually by co-leading the GitLab -> Bitbucket migration, which included scripting the repository migration and aligning application teams.
- Led decoupling of shared container image architecture, isolating production and non-production environments to improve deployment safety and reliability for financial applications.
- Supported biweekly production releases for highly critical financial applications, maintaining fast, reliable deployment cycles and resolving infrastructure issues impacting developers.
- Build Kubernetes, Helm, and Ansible deployment workflows for the AWS migration, translating on-prem release processes into cloud-native CI/CD.

Event Games.io, Newark, NJ January 2024 - May 2024

Software Engineer Intern

- Debugged and optimized 3D game performance, achieving a 60% reduction in load times and fewer user-reported issues.
- Collaborated with teams to integrate client logos and ads into game environments, increasing brand visibility

Logiware Inc, Atlanta, GA July 2023 - December 2023

Backend Software Intern

- Developed Selenium WebDriver scripts in Java to ensure functionality and stability of Logiware Inc's web apps
- Refactored and optimized codebase to improve maintainability and reduce redundancy, streamlining test suites

Khalis Foundation, Milpitas, CA June 2021 - July 2021

Software Engineer Intern

- Developed key components of a vocabulary game using React Native, Node JS, and Redux
- Performed code reviews to ensure industry standards and cross-device compatibility

PROJECTS

- **Chet**: Developed and launched Chet, a Swift iOS app addressing real user pain points in Gurbani apps, achieving #74 in the App Store “Reference” category and growing to 3,000+ daily active users organically
- **SanthiyaPothi.xyz**: A cross-platform application (iOS, Android, Web) made using React and React Native, serving 1,000+ users to learn Santhiya, a traditional Sikh scripture study technique
- **Keerat.xyz**: An audio platform for Sikh-related content made with React (Next.js), serving over 500 active users, with 100+ daily users. Managed full-stack development, leveraging Azure for audio file hosting and AWS EC2 for backend processing

LEADERSHIP & COMMUNITY INVOLVEMENT

Sikh Student Association, Newark, NJ September 2023 - May 2024

President of the NJIT SSA

- Led the organization by creating event schedules, making leadership decisions, gathering student feedback, and collaborating with SSAs from other schools to deliver engaging events tailored to student needs

Technical Skills: *Docker, Podman, Makefiles, Jenkins, Artifactory, Tmux, Vim, Python, Java, Bash, Android Compose, Node.js, React js, React Native, Flutter, Redux, Git, Mysql, Selenium, Azure, AWS, Ansible, Agentic Coding, Claude, Codex, Kiro*
