EDUCATION

New Jersey Institute of Technology, Newark, NJ December 2024
Bachelor of Science in Computer Science

EXPERIENCE

Freddie Mac, McLean, VA (Remote) March 2025 - Present
Full Stack Associate (DevOps / Infrastructure)

- Primary owner of Artifactory, a mission-critical artifact management platform powering all CI/CD pipelines org-wide; responsible for upgrades, maintenance and reliability of infrastructure supporting billions of dollars in financial application deployments and support Jenkins, the central CI/CD orchestration platform, ensuring pipeline stability and onboarding teams to standardized build/deploy workflows
- Develop and maintain the developer toolchain used org-wide including the enterprise base container image, DevBox (developer sandbox environment), and language-specific runtimes (Golang, Java/Tomcat, and others) enabling hundreds of engineers to build and test consistently across environments
- Reduced infrastructure costs by $300K+/year by leading migration from GitLab to Bitbucket using Bash automation and cross-team coordination
- Upgraded enterprise container base images from RHEL 7 -> RHEL 8, resolving system-level compatibility issues across multiple applications
- Led decoupling of shared container image architecture, isolating production and non-production environments to improve deployment safety and reliability for financial applications.
- Developing Ansible-based deployment workflows and contributing to AWS migration using Kubernetes and Helm for scalable, cost-efficient infrastructure
- Supported biweekly production releases for highly critical financial applications, maintaining fast, reliable deployment cycles and resolving infrastructure issues impacting developers

Event Games.io, Newark, NJ January 2024 - May 2024
Software Engineer Intern

- Debugged and optimized 3D game performance, achieving a 60% reduction in load times and fewer user-reported issues.
- Collaborated with teams to integrate client logos and ads into game environments, increasing brand visibility

Logiware Inc, Atlanta, GA July 2023 - December 2023
Backend Software Intern

- Developed Selenium WebDriver scripts in Java to ensure functionality and stability of Logiware Inc's web apps
- Refactored and optimized codebase to improve maintainability and reduce redundancy, streamlining test suites

Khalis Foundation, Milpitas, CA June 2021 - July 2021
Software Engineer Intern

- Developed key components of a vocabulary game using React Native, Node JS, and Redux
- Performed code reviews to ensure industry standards and cross-device compatibility

PROJECTS

- **Chet**: Developed and launched Chet, a Swift iOS app addressing real user pain points in Gurbani apps, achieving #74 in the App Store “Reference” category and growing to 2,000+ daily active users organically
- **SanthiyaPothi.xyz**: A cross-platform application (iOS, Android, Web) made using React and React Native, serving 1,000+ active users to learn Santhiya, a traditional Sikh scripture study technique
- **Keerat.xyz**: An audio platform for Sikh-related content made with React (Next.js), serving over 1,000 active users, with 100+ daily users. Managed full-stack development, leveraging Azure for audio file hosting and AWS EC2 for backend processing

LEADERSHIP & COMMUNITY INVOLVEMENT

Sikh Student Association, Newark, NJ September 2023 - May 2024
President of the NJIT SSA

- Led the organization by creating event schedules, making leadership decisions, gathering student feedback, and collaborating with SSAs from other schools to deliver engaging events tailored to student needs

Technical Skills: *Docker, Podman, Makefiles, Jenkins, Artifactory, Tmux, Vim, Python, Java, Bash, Android Compose, Node.js, React js, React Native, Flutter, Redux, Git, Mysql, Selenium, Azure, AWS, Ansible, Agentic Coding*
